Compliant with the new standard IEC 61557-12 specifically for multi-measurement devices (PMD), they guarantee the operator use of a product designed and tested in accordance with the functional requirements of its application, ensuring a high performance level.

The **DIRIS®** system: the reference

Measurement is the key link in managing an energy efficiency project.

With **DIRIS**, SOCOMEC has developed the most advanced multifunction measurement range on the market, dedicated to improving your energy performance.

For over 20 years, thousands of users, installers or integrators have trusted **DIRIS** innovative solutions for:

- energy metering and management
- electrical facility monitoring
- power quality analysis.

Follow the leader and run with the pioneers, by opting for the **DIRIS** solution.

DIRIS A: compliant with IEC 61557-12

DIRIS A conforms to this new standard, which has been specifically created to govern Performance Measuring and monitoring Devices (PMD). IEC 61557-12 guarantees the user that the product meets all the metrological, mechanical and environmental requirements of an electrical distribution network (EMC, temperature, etc.).

Customised upgradability

Thanks to the optional plug-in modules the product features can be upgraded at any time. **DIRIS A** has optimum adaptability to the requirements of multi-measurement applications.

DIRIS 767 A

SOCOMECH is once again expanding the field of application of the **DIRIS A** with the addition of modules for:

- Ethernet communication
- Temperature measurement & monitoring.

Ethernet connectivity

Allows direct connection to an Ethernet communication network. Module with gateway function enables devices on an RS485 bus to communicate via Ethernet.

DIRIS 749 A - DIRIS 742 A

The embedded WEB server

The new Ethernet communication modules incorporate an embedded web server function, thereby enabling remote operation and configuration of a product without specific software. Access is via your Internet browser, simply by entering the IP address of the **DIRIS**.

DIRIS 829 A - DIRIS 830 A

Expanded monitoring

The new temperature monitoring module:

- enhances energy diagnostics
- improves monitoring of facilities
