

ELECTRICAL TEST, MONITORING & SAFETY EQUIPMENT

Experts in the supply of Electrical Test, Monitoring & Safety Equipment

COMPANY PROFILE

ABOUT US

We are delighted to introduce Powerpoint Engineering Ltd. to you, your 'one stop shop' for all Electrical Test, Monitoring and Safety Equipment. With an ever increasing duty on employers to ensure the safety, health and welfare of people at work, we hope this profile will give you a good overview of the quality product range, professional services, training and advice that we can offer you to meet all your requirements. You can view all these details and more on our website www.powerpoint-engineering.com.

Our Products

Supplying the market since 1996, we are the authorised distributor for the leading manufacturers in the niche areas that we operate. With our in-house technical knowledge, we are the industry experts in the provision of Substation Safety Equipment, Lockout Tagout Equipment, Arc Flash PPE, Substation Test Equipment, Cable Jointing & Tooling, Cable Testing & Fault Location, Electrical Test Instruments, Power Quality & Energy Monitoring, PAT Testers, Thermal Imaging Cameras, High Voltage Testing and Calibration & Repair.

For each of the different business divisions, the company is the authorised distributor in Ireland for the leading manufacturers – our agencies include Megger, SebaKMT, Fluke, Klauke, Greenlee, HD Electric, TE Connectivity, Raychem, Dutchclamp, Master Lock, Seaward, Sofamel, EA Technology, Sibille Fameca Electric, Kewtech, Fristads, ProGARM, Tranemo, FLIR, Extech, SEEK Thermal, 3M, Unipower, Gossen Metrawatt, SATEC, Crompton Instruments, Pfisterer, Regeltex & Cable Detection.

Our Services

We provide various specialist electrical services and reports. These include Calibration & Repair Service, High Voltage Testing, Partial Discharge Survey, Substation Safety Equipment Surveys, Battery Impedance Testing, Insulating Oil Analysis, Lockout Tagout Customisation, Arc Flash PPE Consultation, Power Quality Monitoring Surveys, Energy Monitoring Surveys, Energy Metering System, Thermal Imaging Surveys and Cable Fault Location.

These services are performed by our own experienced team who are the industry experts in these specialist areas and deliver appropriate solutions in a timely, comprehensive and cost efficient manner.

Our Training

We are the industry leaders in providing a range of specialised training courses. These include PAT Training, Thermal Imaging Training (1 Day, Level 1 & Level 2), Lockout Tagout Training, Arc Flash Training, Partial Discharge Training, Substation Safety Awareness Training and Electrical Appreciation Training. Our training can be held on-site at your location or you can attend one of our scheduled courses. As a Registered Training Provider with Engineers Ireland, our training courses may count towards your CPD requirements.

Our Clients

Our clients include generating stations, utility companies, data centres, manufacturing plants, facility management companies, health & safety personnel, engineers, professional consultants & electrical contractors. Below is a sample of our clients:

Quality

The company is committed to quality. We are a Registered Training Provider as awarded by Engineers Ireland. We have also been assessed by the NSAI, and we are deemed to comply with Quality Management System I.S. EN ISO 9001:2015. In addition to this, all of our calibrations are carried out in our in-house laboratory in accordance with Measurement Management Standard ISO 10012:2013.

We are registered as a Level 3 Supplier with Achilles. All of the products offered are designed and manufactured to the highest quality standards and you can be assured that all quality procedures strictly adhere to internationally recognised standards.

Contact Us

You can contact us at any time. Our technical support staff offer expert advice on all aspects of our Products, Services and Training.

OUR SERVICES

Powerpoint Engineering provide various specialist electrical services and reports for our customers. These services are performed by our own experienced team who are the industry experts in these specialist areas and deliver appropriate solutions in a timely, comprehensive and cost efficient manner.

Listed below is a brief overview of the specialised services that we offer:

Calibration & Repair

All of the calibration service work is carried in our in-house lab, by our experienced technicians. We calibrate and repair all makes and models of electrical test and measurement equipment.

High Voltage Testing

At our state of the art, High Voltage Test Bay and Calibration Laboratory, we offer calibration and repair solutions for all makes and models of high voltage, electrical test and measurement equipment.

Partial Discharge Survey

Our engineers, with significant experience working on Medium & High Voltage equipment, have carried out Partial Discharge Surveys for some of Ireland's leading companies for the past 10 years.

Substation Safety Survey

Our expert engineering team can carry out site survey of your electrical switchrooms & substations to assess your electrical substation safety equipment requirements.

Insulating Oil Analysis

In conjunction with our partner EA Technology, we offer Insulating Oil Analysis to our customers at competitive prices with quick turnaround times.

Lockout Tagout Customisation

Our customised service includes in-house laser engraved safety padlocks, customised keying systems & colour coding for your safety padlocks, bespoke shadow boards & cabinets, customised tags & signage and lockout kits.

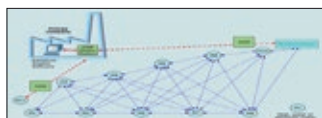

Power Quality Survey

We have been carrying out Power Quality Surveys throughout Ireland since 1996. We use power quality equipment from leading brands such as Unipower, Gossen-Metrawatt and Fluke.

Energy Monitoring Survey

We can perform Energy Monitoring Surveys to suit your specific needs. We provide solutions for Demand Control, Power Factor Correction and Harmonic Filtering.

Energy Metering Systems

We can design and install bespoke Power Quality and Energy Metering Systems to meet your specific needs.

Thermal Imaging Survey

Since 2004, we have been delivering professional and independent surveys and advice to building professionals, energy consultants and engineers.

Cable Fault Location

Our Cable Fault Location Service is carried out by our skilled technicians using the most up-to-date cable fault location equipment available on the market.

Powerpoint Engineering are the industry leaders in providing a range of specialised training courses in Ireland. Our training courses are conducted by highly qualified and experienced training instructors with many years of experience and expertise in their respective fields. Our training can be held on-site at your location or remotely using our online training platform. All our attendees receive training certificates and course notes. As a Registered Training Provider with Engineers Ireland, our training courses may count towards your CPD requirements.

Listed below is a brief overview of some of the training courses that we offer:

PAT Training

Our 1 Day PAT Training Courses are held in Dublin, Cork and Galway at regular intervals or on-site at your location. The aim of our 1 Day PAT Training course is to provide you with an overview of what is PAT Testing, the legal requirements relating to this, various tests involved and the appropriate equipment to use. You can view full details on our dedicated website www.pat-testers.ie.

Thermal Imaging Training

We run regular scheduled Thermal Imaging Training Courses in Portlaoise, Cloughjordan or on-site at your location, in conjunction with our accredited training partner, Infrared Training Limited. These courses include 1 Day 'Introduction to Thermography' Training Course, 4 Day 'Level 1' & 'Level 2' Thermal Imaging Certified Training Course and '4 Day Air Tightness Testing' Training Course. You can view full details on our dedicated website www.thermalimagers.ie.

Lockout Tagout Safety Awareness Training

Our Lockout Tagout Safety Awareness Training Course is conducted by our highly qualified and experienced training instructors. Our Scheduled Training Courses are held in Portlaoise at regular intervals, training can also be carried out on-site at your location with each session usually taking between 2 and 3 hours. This course has been approved by Engineers Ireland and will give you a very good introduction to and appreciation of Lockout Tagout and your legal requirements. You can view full details on our dedicated website www.lockoutsafety.com.

Arc Flash PPE Safety Awareness Training

Our Scheduled Training Courses are held in Portlaoise at regular intervals, training can also be carried out on-site at your location with each session usually taking 2 hours. With an ever increasing duty on employers to ensure the safety, health and welfare of people at work, this course will give you a very good overview of Arc Flash Hazards and the importance of wearing appropriate Arc Flash PPE. You can view full details on our dedicated website www.arcflash.ie.

Electrical Appreciation Training

Our Electrical Appreciation Training course is a 1 day course held on-site at your location. The objective of the course is to give an understanding of basic electrical theory and electrical safety awareness to non-electrical technical staff including Facility Managers, non-electrical Engineers, Maintenance Personnel and Safety Officers. You can view full details on our dedicated website www.powerpoint-engineering.com.

Substation Safety Awareness Training

Our Substation Safety Awareness Training course is a ½ day or 1 day course depending on your requirements. The objective of the course is to give your staff the tools necessary to identify the electrical rescue safety equipment that is available on-site and to help them to use and maintain this equipment. The course is held on-site at your location and it can be tailored for technical or non-technical persons. You can view full details on our dedicated website www.powerpoint-engineering.com.

CLIENT TESTIMONIALS

Our company ethos is very much focused on you, the customer and providing you with the best possible products, service, training, advice and support. We have the best in product coupled with the best in advice and customer service to meet all your specific requirements.

Below is a sample of our Client Testimonials that have been obtained in April / May 2020:

Sensori FM Limited (formerly known as Designer Group FM) has been using Powerpoint Engineering for many years for all our LOTO and Arc Flash requirements. The products have always been of a high quality and deliveries are always on time. The team are very friendly and have a good knowledge in relation to the products offered. We look forward to continuing our working relationship with Powerpoint Engineering as our business progresses and evolves.

Orla Walsh
Procurement, Sensori FM Limited

H&MV Engineering Limited is a recognised brand providing specialist energy services for industry and utility sectors around the world. At H&MV we have vast experience in the design and build of substations, offering a unique in-house turnkey solution to our clients. Our reputation is built on high quality workmanship, project delivery and our commitment to safety. Based on our high standards we choose suppliers who share the same beliefs and mirror our characteristics. Powerpoint Engineering Limited are a preferred supplier of H&MV. Powerpoint Engineering listen carefully to our needs and provide us with the necessary equipment and solutions that we require. We have developed a long-standing relationship that is built on trust and respect. Powerpoint Engineering provide us with high quality goods and equipment at competitive prices, on time and constantly ensure that we are kept in stock of key items. Their expert staff are available to discuss our needs and provide us with excellent customer service above and beyond our expectations.

PJ Flanagan
CEO, H&MV Engineering

Powerpoint Engineering has supported our business here in Powercomm Engineering since start up. They are one of our most important suppliers who have supported us at the highest level. The professionalism shown by Liam and the staff is always second to none. Powerpoint range of Products and services means they can support our business on all fronts. As a supplier they are customer focused and are always available to support us in normal business activity but in emergency situation also. There has been many occasions where Liam, Des, Gavin or Robert has helped us out in emergency call out situations, out of hours and at weekends. When we needed real support it was never an issue. You can't buy this level of service and we are very grateful that we have Powerpoint as a main supplier. Thank You to Liam and his Staff.

James Cafferty
Managing Director, Powercomm Group

Suir Engineering have used Powerpoint for the past number of years for their MV, Earthing, Testing and Safety Equipment. We have found Powerpoint to be very helpful and they're always available to give advice and help you chose the right equipment / material for the project. Their employees are very knowledgeable would go out of their way to assist in any way possible.

Paddy Byrne
HV Project Manager, Suir Engineering

Powerpoint Engineering is an exceptional company staffed by professionals with a thorough knowledge of the industry. They consistently exceed expectations and are always available to assist when the need arises. We highly recommend Powerpoint Engineering as a key business and strategic partner.

Brendan Geoghegan
Director, Nahanagan Electrical Engineering Services Ltd.

Our business requires innovation, quality, quick turnaround and competitive pricing. Powerpoint's technical ability and prompt response are in our opinion second to none. We have formed a strong relationship with Powerpoint Engineering and look forward to their continued support.

Ian Ryan

Energy & Utilities Manager, Wyeth Nutritionals Ireland Ltd.

I have dealt with PowerPoint Engineering in sourcing customized safety solutions for the data center industry and found that they always bring professional, innovation and best practice when dealing with the team. Our products range from LOTO shadow boards, retractable belt barriers to enlarged white boards with Electrical schematic's printed for interaction during works. These solutions have provided our team with efficiency and safety during our daily operations. I look forward to dealing with the team in the future and excited to see what solutions for the data center industry they will bring to the table.

Stephen Blake

Critical Facility Engineer, Facebook

It's a pleasure to deal with the friendly efficient staff at Powerpoint. I always get a quick reply with very competitive pricing and excellent lead times for high quality products. The after sales support through Powerpoint is fabulous and you're never in any bother as answers are always at hand. I've been dealing with Powerpoint for many years and I have no hesitation in recommending them to my colleagues or site contacts.

Donal O'Donovan,

MRO Integrator, Rexel Industrial Solutions

We at EES use Powerpoint Engineering for the supply of our Arc Flash Protection equipment. We have always found the team in Powerpoint Engineering to be courteous, prompt and efficient from quote stage to processing our orders and eventually delivering to site.

Jeff Hynes

Operations Manager, Bristol-Myers Squibb (BMS)

We have been using Powerpoint Engineering for a number of years, we have used Powerpoint for Arc Flash PPE, Test Equipment and LOTO equipment and have found them to be extremely helpful with any queries made and reliable when arranging deliveries. The products provided are always top drawer and Powerpoint have gone above and beyond on a number of occasions to ensure we received the materials on time.

Ian Dagg

Quality & Commissioning Manager, Jones Engineering

Powerpoint is one of the key delivery partners of Gaeltec. It's been a pleasure to work with such a professional team for many years, and we will surely continue for the years to come.

Ricardo Lopes

Project Manager, Gaeltec Utilities Limited

Power point Engineering are a good efficient and knowable company with a good supply of material and a quick turn round on orders & deliveries. They have a top class knowledge of their product lines are able to supply solutions and equipment to meet requirements on site.

Colm Doohan

Purchasing Manager, Winthrop Engineering & Contracting Ltd.

Working with Powerpoint is a pleasure. The level of communication for open order and new RFQ's is excellent which leads to successful procurement process. Powerpoint will endeavour to ensure on time delivery of product going that extra mile to "make it happen" if there are stock inaccuracy with us to ensure production is maintained. We here in CG look forward to continuing working relations with them.

Olivia McCabe

Head of Purchasing & Sourcing, CG Power Systems Ireland Limited
